

## Wallpapering

**Need some help?**

**There is not much call for wallpaper around here because most of the walls are textured drywall or stucco and you need a flat wall for wallpaper.**

**However . . .If you do have flat untextured walls and need some help with the wallpapering call me.**

**or**

**There are techniques to flatten a textured wall to prepare for wallpapering. Usually involving adding a layer of drywall. Of course that increases the cost of the project.**

**Call**
